MUSICPORT MP 55 GETS MUSIC IN YOUR ROOM

TP 55

MP 55

KEL 55

The music port MP 55 is a wall holder with audio amplifier for portable music players and charging function for iPod* and iPhone*. With its 55 x 55 mm front plate it is compatible with various switch ranges. The MP 55 lets you charge your music players and play music directly. When connected to the music port, the iPod*/iPhone* can be controlled with the optional IR remote control TP 55.

In combination with the in-wall loudspeaker which matches the switch ranges "KEL 55" the MP 55 can easily be upgraded. Just take out two power sockets, and put in the music port and the in-wall loudspeaker of the same design with a 55 mm cover plate. Of course you can also connect high-quality external loudspeakers to the stereo amplifier output of the music port. And thanks to its stereo line-out output, the MP 55 can also be connected to a WHD multiroom or a hi-fi system.
